

D Banker deceased

The Holstein topsire D Banker (V Bojer x B Patron) died on March 30 in VikingGenetics' bullstud in Assentoft in Denmark – almost 7 years old. In 2008 D Banker was our most used sire in both Denmark and Sweden with 93,171 inseminations, and so far 31,794 doses of semen exported to 13 different countries.

Furthermore D Banker is used intensively as sire of sons in both VikingGenetics and AI Centres abroad. Thus D Banker will influence the future Holstein breeding heavily – nationally as well as internationally.

In 2008 D Banker was honoured as Sire of the year in Denmark – in honour of the breeders Anker and Chr. Lund in Skodborg, Denmark.

VikingGenetics still has a minor stock of semen after D Banker and this will be desired after the sire's goodbye!
