

## **The elite beef breeds are back at the Agromek Show**

After a few years away the beef breeds return to the Agromek Show with elite animals. 12 top animals from the most widespread breeds will be shown during the entire Agromek. The animals will be shown in building 5 which is close to Hall Q. Furthermore 220 animals will take part in the beef breed show on Friday and Saturday.

Simmental will show a progeny group of 3 heifers after the sire Lykke Atlantis. This sire is known for his fine evaluation for both production and conformation traits.

The current insemination bull, Løserupgård Ambrendt, will be with the Limousine group with a daughter after the most used sire, Thy Sullivan.

Aberdeen-Angus has just approved a new young bull for the insemination program. This bull, Mønline Limited Edition, will also be among the elite animals.

Danish Charolais will also be represented with animals of very high quality. Among other a daughter after Prins Hvirring that has won several Interbreed competitions.

Hereford will show two bulls with animals descending from the known Remitall and Harvie herds. Several of our insemination bulls date back to these herds.

Finally, Blonde D'Aquitaine will be at the elite show with two animals after some of the bulls from which we have imported semen in connection with our breeding work.

We welcome you to our show with the best Danish beef cattle during the entire Agromek, 24-28 November in building 5.
