

Fine presentation of Viking descent at the AgroNord Show

Once again the AgroNord Show 2009 in Aars was a fine show presenting excellent daughters after VikingGenetics bulls. Hence the winners in all three categories were daughters after VikingGenetics bulls – and so was the winner of the competition across the daughter groups.

VikingGenetics showed daughter groups after D Sammy and V GroovyBL – both presenting the bulls' breeding patterns. The winner from the group after V GroovyBL also won the competition across the daughter groups.

The quality of the elite cows was very high, and daughters after D Maniche, RGK Bjørn and KOL Nixon won the model competitions for young, middle and older, respectively.

At the show's auction there was high willingness to buy and the highest price was achieved by a daughter after V GroovyBL – DKK 34,000!
